To Whom It May Concern:

Letter of Reference for CYSA Development Management Corp.

CYSA Development Development Management Corp furnished the smoke curtains for the Integrated Sciences Building at UMass Amherst. Professional Drywall Contractors installed the smoke curtains under the guidance and direction of CYSA. The Integrated Sciences Building was a \$98,500,000.00 construction project and CYSA's contract for the smoke curtains was \$219,048.00. The smoke curtains were installed in a four story atrium and tied directly into the fire alarm system. During all the pre-testing and the test with the state and local officials for Temporary Certificate of Occupancy their performance was implacable.

Steven S. Sadeghian is the CEO of CYSA and he was our primacy contact for the smoke curtains. Mr. Sadeghian was always very helpful and professional, with both UMass and Gilbane. He definitely knew everything there is to know about the construction of smoke curtains and their functionality. The shop drawings were delivered to us on time as well as the delivery of the smoke curtains from England. The installation of the smoke curtains under his direct supervision was flawless.

I personally would utilize Steven S. Sadeghian on my next project that requires smoke curtains.

Respectfully yours,

Frank Danahey
Onsite Project Executive
